Your platform for future growth

Act big, look sharp, and connect with your customers.

Entrepreneurs, start-ups, professionals, and small companies get more business with eCompany In A Box.

eCompany In A Box quickly integrates telephones, hand-held devices, voice mail, teleconferencing, email, shared-calendar, web presence, file sharing, and back-ups.

For an affordable initial installation fee and low monthly cost, eCompany In A Box lets you present and maintain a professional image and lets you, your team, and your partners communicate and collaborate from anywhere with ease.

All your start-up needs in one Box

As a startup operating from locations in Colorado and California, our company needed help uniting the team under one virtual roof. The team at Convergent Informatics was able to achieve this on a tight timeline and provide expert support to make it all work seamlessly.

-- Michael Reilly, CEO
Western States
Biopharmaceuticals

When I took over as CEO of a virtual biotech with a phase 2 diabetes drug, I needed to hit the ground running. All of the important connectivity elements, such as phone, email, calendar, virtual operator, website and file storage did not exist and needed rapid setup.

The rapid installation of the eCompany in a Box product, and the support provided by the Convergent Informatics team were instrumental in ensuring a smooth and rapid transition into my new role.

- Carl LeBel, PhD
Chief Scientific Officer,
Otonomy, Inc.

Get the most from your Business Systems
